

As the world's leading certification, inspection, testing and verification company, your car's manufacturer trusts SGS to provide its third party in-use verification program testing. Through this program, we test vehicles to ensure manufacturers are meeting or exceeding emissions requirements throughout the life of the vehicles they sell.

WHAT CAN I EXPECT?

- We will go over the process with you when you drop your vehicle and can even show you where your vehicle will be tested
- You'll be able to pick up your newer model rental car at the same time and location of your drop-off
- Your rental will have a full tank of fuel
- We will need your car for approximately 2 weeks to complete all necessary testing
- You'll receive your incentive check when you pick up your vehicle once the testing has been completed, so there is no waiting for a check in the mail
- The exterior and interior of your car will be cleaned before pick up, and you'll have a full tank of fuel

WHAT TYPE OF TESTING WILL BE DONE ON MY CAR?

- In-use testing is performed in our labs on our advanced chassis dynamometers, pictured below
- Your vehicle will be run on an indoor roll to simulate real world driving conditions without exposing your car to the elements or dangers of real-world driving
- We will be testing for the emissions your car gives off in these real world driving conditions and will be providing the vehicle manufacturer with data and reports outlining current performance characteristics of your car
- This data not only helps your car manufacturer meet EPA emissions requirements, but helps inform the development of future models of your car

WHERE DO I DROP MY CAR OFF?

COLORADO

2022 Helena St Aurora, CO 80011

INDIANA

635 S Mapleton St, Columbus, IN 47201

WHY SGS?

Around the world, in almost every industry, companies rely on our international teams of experts to provide specialized business solutions to make businesses faster, simpler and more efficient. We partner with companies to offer independent services that will help reduce risk, streamline processes and operate in a more sustainable manner.

SGS is the world's leading inspection, verification, testing and certification company. We are recognized as the global benchmark for quality and integrity. Our core services can be divided into four categories:

- **TESTING:**

Our global network of testing facilities, staffed by knowledgeable and experienced personnel, enable companies to reduce risks, shorten time to market and test the quality, safety and performance of products against relevant health, safety and regulatory standards

- **VERIFICATION:**

We ensure that products and services comply with global standards and local regulations; combining global coverage with local knowledge, unrivaled experience and expertise in virtually every industry, SGS covers the entire supply chain from raw materials to final consumption

- **INSPECTION:**

Our comprehensive range of world-leading inspection and verification services help companies meet all relevant regulatory requirements across different regions and markets

- **CERTIFICATION:**

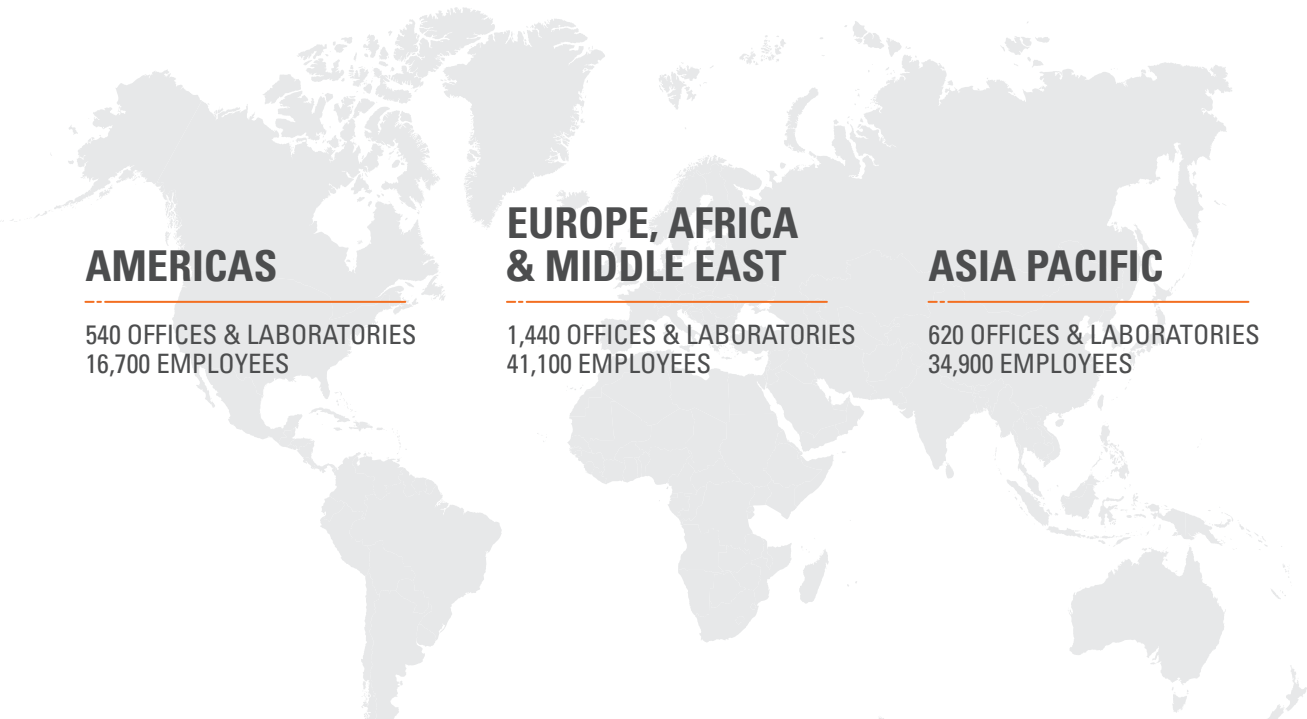

We enable companies to demonstrate that products, processes, systems and services are compliant

As well as delivering services that promote sustainable development, our values also show a commitment to corporate sustainability. For us, sustainability is about managing a long-term profitable business while taking into account all the positive and negative environmental, social and economic effects we have on society.

If you still have questions or would like to learn more about the In-use Verification Program, please email us. transportation@sgs.com or call 1 (303) 903-1822
