

SGS I/M PROGRAM MANAGEMENT SERVICES

MANAGEMENT OF VEHICLE SAFETY INSPECTION AND EMISSIONS TESTING PROGRAMS FROM COAST TO COAST

Backed by the world's leading inspection, testing, verification and certification company, SGS provides vehicle safety inspection and emissions testing programs for the public sector. We offer a unique suite of products and services tailored to the needs of each of our clients. Our team is able to draw on local resources with broad experience in custom software development, information management, equipment deployment, equipment maintenance and end-user support while leveraging global financial resources to make sure your program is always online and fraud-free.

WEB-BASED SOFTWARE, CUSTOMIZED FOR YOUR PROGRAM

SGS offers software that provides our customers with the ability to collect and manage safety and emission data efficiently, securely and easily. The software's flexibility, broad functionality and ease of use make it easy to integrate.

- Role-based security
- Web-based front end
- Operates on PCs, tablets, smart phones and other hand-held devices
- Simple integration with a cabinet to facilitate a touchscreen kiosk

ONLINE TOOLS & BRING YOUR OWN DEVICE OPTIONS AVAILABLE

Appropriate agency staff and customers will have access via our management console to inspectors. You can access the console from a web browser with no requirements for special plug-ins or system extensions, making program management simple and efficient.

- Role-based security
- Accessible by state agency personnel, and, if desired, inspection station operators, and motorists
- Inspection station management
- Inspector management
- Messaging
- Sticker management
- Reporting

SGS AN INDUSTRY LEADER

As the world's leading inspection, verification, testing and certification company, SGS delivers solutions for customers spanning 11 different industries including the Transportation industry. With 95,000 employees worldwide and 2,400 offices across the globe, We are constantly anticipating customers' and society's evolving expectations in order to deliver market leading services wherever they are needed.

BENEFITS

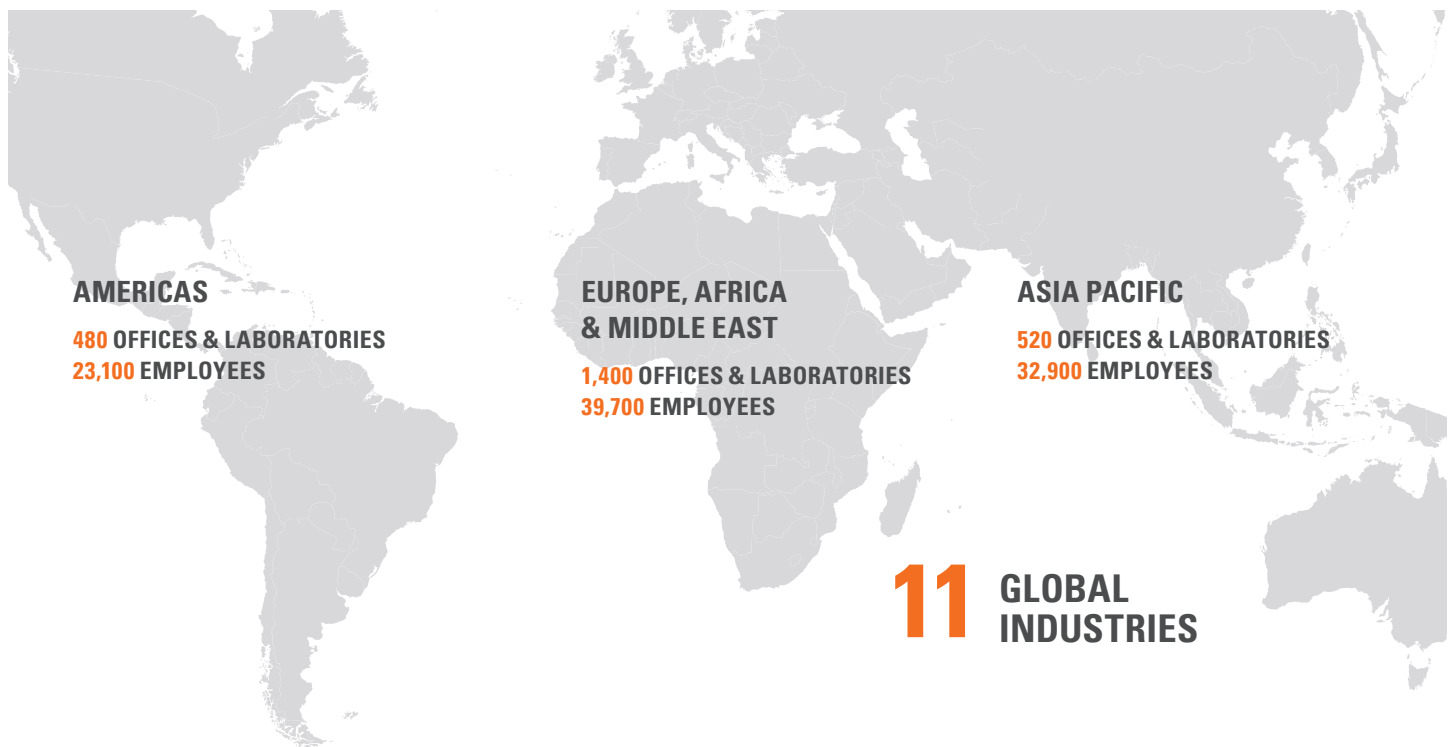

Our Transportation team within North America works with our clients to solve problems and manage programs that improve the safety, environment and compliance of the transportation ecosystem.

- Rapid start-up of programs due to our extensive industry background
- Resources to bring your solution to market quickly and efficiently
- Solutions that leverage data in ever increasingly effective and creative ways
- Ensure compliance and get new insights that contribute to a safer and healthier world
- Advanced testing methods requiring the power of smart transportation data analytics, such as connected vehicle and autonomous vehicle quality assurance
